SPECIAL OFFER

REPLACES TOXIC CHEMICAL CLEANERS

"Best of all... It's Only Water!"

(yet, it's just so damn powerful)

USES FOR GLIM

RESTAURANTS, CAFES, and FOOD TRUCKS

Glim is an ideal cleaning solution for your commercial kitchen and public or common eating places.

HOTELS, RESORTS, SPAS and GYMS

BENEFITS OF GLIM

IT'S ONLY WATER, YET SO POWERFUL!

Our 12.5 pH GLIM Water can replace all detergents, soaps, and cleaning agents.

DEGREASES OILY SURFACES ON CONTACT

Use Glim on greasy skillets, grills, pots, and pans to immediately emulsify the oil and

Hospitality and workout facilities benefit greatly from using Glim in their guest rooms, common areas, and exercise areas.

SCHOOLS, UNIVERSITIES, DAY CARE and ASSISTED LIVING FACILITIES

Glim is the perfect safe, non toxic, odor-free cleaning solution to use around children, students, and the elderly.

HEALTHY HOME KITCHEN CLEANING

Protect your family using Glim in your kitchen to clean countertops, dishes, sinks, skillets, and more.

BATHROOM CLEANER and DEODORIZER

Glim works wonders in your bathroom. Use on sinks, toilets, tubs, counters, floors, and to eliminate unpleasant odors.

CARPETS, RUGS, FLOORS, FURNITURE, and FABRICS

Easily remove stains, dirt, and odor from your carpet and clothes. (Removes blood, wine, makeup, and more)

PERFECT PET CLEANER and DEODORIZER

Keep your dogs, cats, and other domestic pets clean and odor free using Glim on a regular basis.

parts to immediately dissolve the oil and easily clean without soap or detergents.

NEUTRALIZE ODOR MOLECULES

From foul smelling garbage cans, to overpowering odors in the bathroom, use Glim to neutralize odor molecules in the air.

REPLACES TOXIC CHEMICAL DETERGENTS!

Glim is essentially the perfect cleaner, and can easily replace the toxic chemical soaps and detergents you use every day... but it's as harmless as water!

RID YOUR HOME and BUSINESS OF TOXIC CHEMICALS

Glim's high pH achieves the same high alkalinity of most chlorine and soap based cleaners but without the use of chemical additives.

ECOLOGICALLY THE RIGHT THING TO USE

Despite it's powerful cleaning effects, GLIM Water is environmentally friendly and non-toxic.

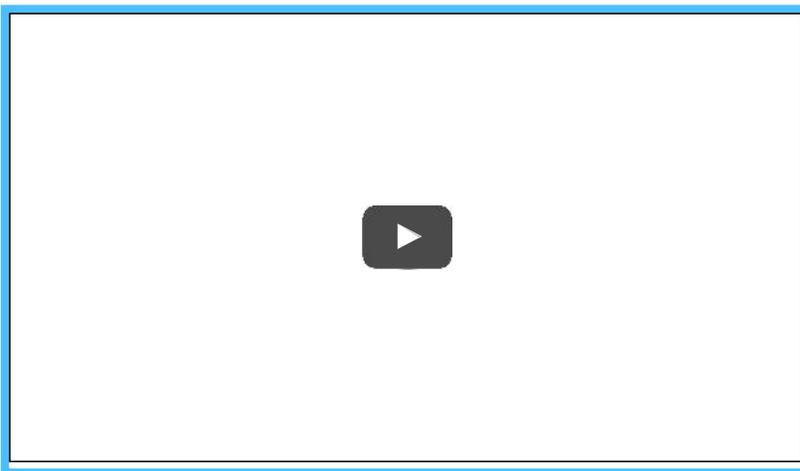

CHEMICAL FREE MADE OF 99.83% WATER

No harmful chemicals and surfactants that destroy our environment or contaminate our water.

FREQUENTLY ASKED QUESTIONS

? What is GLIM™ Super Alkaline Ionized Water? 

GLIM™ SAI water is a high alkaline water with a pH ratio of 12.5 produced through an ionizing electrolysis method using 99.83% pure water filtered by reverse osmosis (RO) and 0.17% Potassium Carbonate as an electrolyte (K₂CO₃), which will be KOH after production.

? What does a value of 12.5pH mean? 

? Water above 12.5pH is supposed to be corrosive - is this water safe? 

? Is it safe to touch GLIM™ SAI water with bare hands? 

? Does GLIM™ SAI water smell? 

? Is it safe for children to come in contact with any objects or surfaces that have been cleaned by GLIM™ SAI water? 

? Why does GLIM™ SAI water have strong cleaning power even though its 99.83% water? 

? Any caution for objects to be cleaned by GLIM™ SAI water? 

? Is there any damage to the environment when GLIM™ SAI water is drained?

Stain Removal Demo

Eliminating Odors Demo

Obtain two clear water glasses. Buy some cherry tomatoes and place them in both glasses up to the rim. Then fill one with tap water and the other with GLIM water and move the tomatoes around in both glasses simulating washing the tomatoes with water. After a few swirls, pour the water from both glasses into two new clear glasses and observe the difference in color. You will see how GLIM removes the pesticides sprayed on vegetables (mainly atrazine) without any soap or detergents. pesticides are mixed in oil so that rain will not wash it off easily. Tap water will not emulsify the oil, therefore the pesticides remain on fruits and vegetables unless washed with GLIM or some chemical detergent.
